

Fayette Pipe

ASTM A53 Grade A Schedule 40 ERW Standard Black Steel Pipe

VETERAN
OWNED

MADE IN
THE U.S.A.

FAMILY
OPERATED

for Fire Sprinkler, HVAC,
and Low-Pressure
Plumbing Applications

Quality You Can Trust – Every Time

A VETERAN- & FAMILY-OWNED BUSINESS

Fayette Pipe Company, a division of Specialty Conduit, manufactures high-quality ASTM A53 Grade A Schedule 40 ERW black steel pipe for fire sprinkler, HVAC, and other low-pressure plumbing applications.

Fayette Pipe benefits from our parent company's more than 20 years of experience in threading, elbow, nipple, coupling production, and value-added services to create a one-stop solution for our customers.

MANUFACTURED FOR RELIABILITY

Fayette Pipe is made from high-quality coil slit to the precise width, ensuring a superior finished product. The strip is transformed and contoured by our high-frequency electric resistance weld (ERW) pipe mill for seam welding. It then passes through an Eddy Current (NDT) testing process before it is sized, straightened, painted, and cut to its final lengths.

The pipe then travels through an end-facing process before each pipe is hydrostatically tested to conform with ASTM A53 requirements. We offer our high-quality 1/2" – 2" diameter pipe in plain end, threaded, coupled, and 10' threaded on both ends. **Fayette Pipe** is UL/FM approved and produced to ASTM A53 specifications.

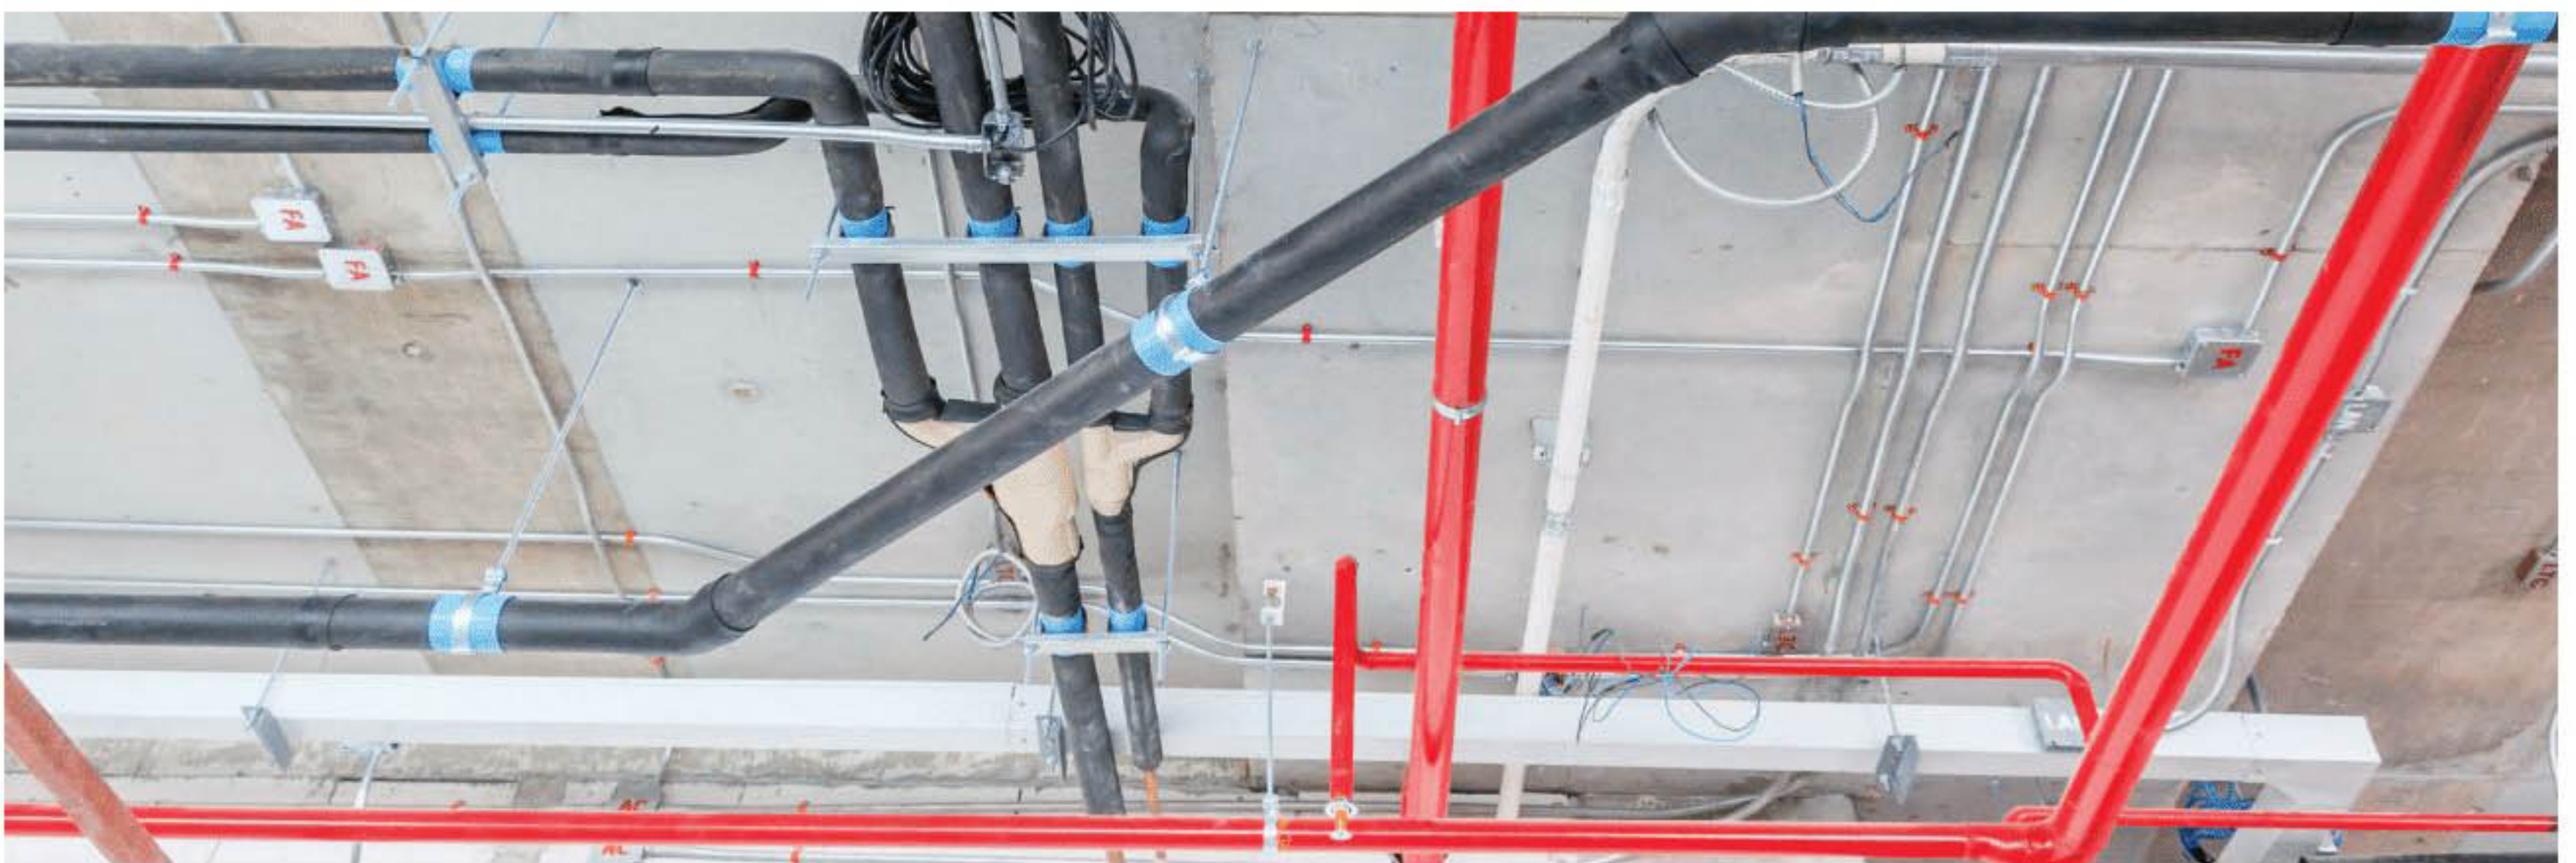

Fire Sprinkler Systems

THE FIRE PROTECTION PICK

Fayette Pipe's ASTM A53 black steel pipe is the go-to material for fire sprinkler piping systems. From our clear MIC Defense antimicrobial coating to the strictest testing protocols, make **Fayette Pipe** your affordable and reliable choice.

HVAC & Plumbing Applications

FAYETTE PIPE IS USED FOR:

- hydronic piping
- drains and overflows
- emergency generator exhaust
- safety and relief valve discharge
- steam vents
- high- and low-pressure steam
- air lines
- gas lines

ALL FAYETTE PIPE PRODUCTS ARE PROUDLY MADE IN THE USA

For product questions, technical information, and engineering support, contact us at sales@fayettepipe.com or **724.438.7600**.

MIC Defense is a clear corrosion inhibitor designed to protect wet, dry, and pre-action fire sprinkler systems and other standard pipe closed-loop systems from

microbiologically influenced corrosion (MIC) and oxygen corrosion. MIC Defense is applied to the inner wall of the pipe during production.

DIMENSIONS & WEIGHT

NPS	OD/in.	ID/in.	Nom. Wall Thickness	Wt. lbs./ft.	Pieces per Bundle
1/2	0.840	0.622	0.109	0.85	127
3/4	1.050	0.824	0.113	1.13	91
1	1.315	1.049	0.133	1.68	70
1-1/4	1.660	1.380	0.140	2.27	51
1-1/2	1.900	1.610	0.145	2.72	44
2	2.375	2.067	0.154	3.66	30

ON-TIME DELIVERY ANYWHERE IN THE US

Fayette Pipe delivers ASTM A53 Grade A Schedule 40 ERW black steel pipe to your locations when you need it. We'll exceed your expectations with a high-quality product backed by a great logistics team.

Specs at a Glance

FAYETTE PIPE

- ASTM A53 Grade A
- Type E
- Schedule 40
- Electric Resistance Welded
- NPS 0.5" to 2" diameter
- Suitable for welding, threading, press connections, and roll grooving
- Plain end, threaded, and coupled
- 10' threaded both ends
- Thread taper from 0.125" up to 0.75"
- Pipe lengths up to 21'
- UL listed 852 and FM approved 1630
- Continuously stenciled
- Hydrostatic & nondestructive electric testing
- MIC Defense antimicrobial coating

BENEFITS OF ERW PIPE

- Energy-efficient production
- High-precision dimensional tolerances
- Better sealing capability
- Superior threadability
- High welding properties

Safe, Reliable Piping Solutions

We have set the bar very high as a family- and veteran-owned business. After all, we have our honor, name, and legacy to uphold. Our pipe is backed by a commitment to quality at a fair price and a focus on you, our customer.
