## Fayette Pipe Expands Product Line with Schedule 10 Sprinkler Pipe

**Lemont Furnace, Pa., March 29, 2023** – Fayette Pipe, a manufacturer of ASTM A53 Grade A ERW Schedule 40 black steel pipe along with steel pipe nipples for fire sprinkler systems, HVAC, and plumbing applications, has introduced Schedule 10 pipe to its product line.

Fayette’s Schedule 10 A795/A135 black steel pipe is for new construction and retrofit fire sprinkler systems. The company’s Schedule 10 pipe is hydrotested to ensure the highest quality. It’s available in diameters of 1" - 2", with 2-1/2" becoming available mid-summer, and from 10' up to 21' in length with beveled or grooved ends. All Fayette Pipe products are UL listed and FM approved.

"Based on marketplace demand, we saw a need and have worked diligently to develop our 100% American made and melted Schedule 10 hydrotested pipe. Our goal is to have a vast inventory of readily available piping and components for our customers," Chris Gearing, vice president of Fayette Pipe, said.

###

### ABOUT FAYETTE PIPE

Fayette Pipe, headquartered in Lemont Furnace, Pa., is a division of Specialty Conduit and Manufacturing. It’s a veteran- and family-owned business producing American-made ERW black steel pipe and nipples. Fayette benefits from its parent company's more than 21 years of experience in threading, elbow, nipple, coupling production, and value-added services to create a complete solution for its customers.
